

DocScan 3.0

NOW with
OCR & PDF

Document Scanning - Just Got Better

DocScan 3.0 software drives your document scanner, reads the barcode on the first page of your documents and then organizes the scanned pages into multi-page TIFF and PDF files.

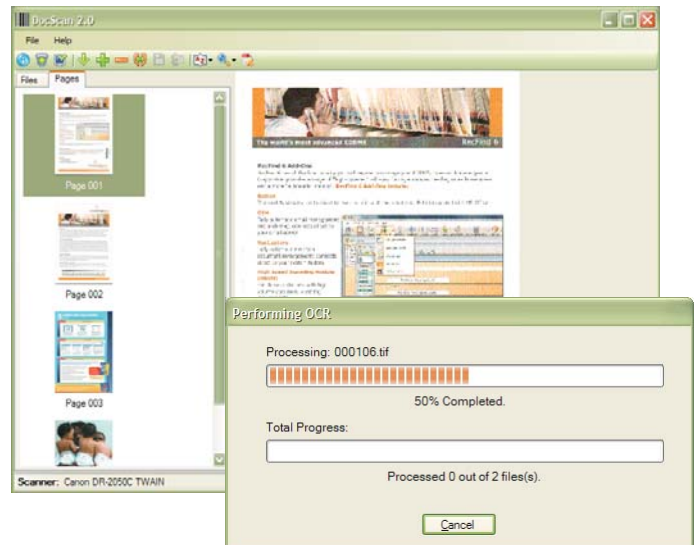

DocScan 3.0 is a .NET application with significantly improved functionality and performance. It can scan color, merge and split scanned images, OCR your scanned document and produce a searchable PDF.

You can even use it with any records or document management product!

- **DocScan** works with any TWAIN scanner and supports a high speed document feed and multi-page TIFF files
- **DocScan** automatically recognizes a barcode on the first page of any multi-page document and scans and stores it as a TIFF file using the barcode number as the filename
- **DocScan** allows you to manipulate TIFF images by inserting or appending pages, and splitting and combining images into a single TIFF file
- **DocScan** can be used with any EDRM product
- **DocScan** handles monochrome and color images
- **DocScan** has an option to OCR the scanned image
- **DocScan** can produce a searchable PDF file
- **DocScan** fully automates the bulk scanning process
- **DocScan** comes with detailed online help and support
- **DocScan** runs under Windows2000, WindowsXP or Vista (Requires Office 2003 or 2007)
